ABOUT US

Evans Army Community Hospital is part of the Fort Carson U.S. Army Medical Department Activity (MEDDAC), a premier system of health providing services to more than 72,000 Soldiers, Family members and retirees in the Front Range. Evans provides a full range of services for patients, from routine primary care to sophisticated, high-tech speciality care.

All of our enrollees are assigned a personal Primary Care Manager at one of our Family Medicine Clinics. Each of these clinics operates on the Patient-Centered Medical Home model. This concept puts the beneficiary at the center of a core health care team. Working in tandem with the beneficiary on a personalized health plan, the PCM and his/her core health team provides or arranges for necessary care in a timely manner.
